RE: Jinko Solar PV modules with the Pegasus Lightspeed racking system

To Whom It May Concern,

Jinko Solar confirms the installation of Jinko PV modules JKM2xxP and PP -60 PV modules in conjunction with the Pegasus Lightspeed system (ETL20150601) with a maximum upward force of 2400Pa and downward force of 2400Pa and a maximum 19" cantilever along with installations with an upward force of 2400Pa and downward force of 5400Pa and a maximum 12" cantilever will not void the Jinko Solar standard limited warranty.

With the Jinko modules being installed within the guidelines detailed in the Pegasus Solar Lightspeed Mount Installation Manual 917-0001-001, the modules are still covered by Jinko Solar's standard warranty agreed in the Purchase Agreement. However, Jinko Solar shall not be liable for any damage of the PV modules due to causes not attributable to Jinko Solar including without limitation the faults of the engineering and/or construction or design of PV system.

Sincerely,

Daniel Chang
